

MP Spritzmuster Cover

Perfect solution for sample coatings

The new spray sample covers by MP create an ideal storage solution for spray sample cards. With space for filling in date, colour code and your own notes, spray patterns can be stored clearly and systematically.

Metal spray sample cards are perfect for matching colour shades before painting. Available primed in the three filler colours white, light and dark grey, the metal cards by MP simulate the corresponding substrate. On top of that a contrast area can be used for testing the opacity.
