

Mipa 1K-UV-Füller

Extremely fast drying primer surfacer

Mipa 1K-UV-Füller is a high-quality, UV-drying filler for fast and economic refinishes.

- sandable after only 5 minutes drying by means of UV-light (UV LED lamp, mercury vapour lamp, sun light)
- very fast cycle times, no heating-related costs, no pot life
- drying is largely independent of ambient temperature and humidity
- very good adhesion to steel, iron, aluminium and galvanized substrates
